

PENINSULA RADIOLOGY ACADEMY

Lectures

Talks will be held in the main lecture theatre. Topics will encompass the evolution of Radiology as a speciality, the job of the Radiologist, Interventional Radiology, application, training and what the future holds.

VIST Angiographic Simulator

A state of the art simulator for vascular intervention procedures. Still in it's infancy but expect widespread future utilisation.

3D Workstations

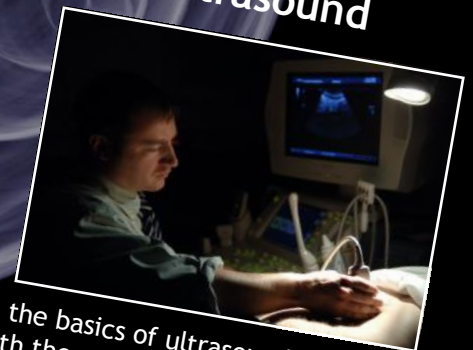

These AW workstations allow CT acquisitions to be viewed in any plane. They also allow the creation of high quality 3D images.

PACS

High resolution displays give optimum image quality. They are coupled with 3D capabilities, a patient information system and voice recognition.

Ultrasound

See the basics of ultrasound demonstrated with the option of having a go yourself.

Discussion

A chance to discuss the morning's topics or any Radiology related queries you may have. Refreshments provided.
