

Peninsula Radiology Academy MSK Radiograph Reporting Course 2023

Wednesday 1st March 2023
08:30-16:30

This course will be delivered as a virtual course via Microsoft Teams.

Musculoskeletal radiographs are the most commonly reported imaging study done in any hospital. A systematic approach and identifying the various pathologies are crucial for patient care.

The Peninsula Radiology Academy MSK course is aimed at junior radiology trainees, junior doctors and radiographers looking to improve their musculoskeletal radiograph reporting skills.

The online, 1 day course will cover pathologies with a combination of lectures and cases to maximise the breadth of knowledge gained.
